

ANYPAD

WELCOME TO ANYPAD

Multi-Chain Launchpad + Multi-Chain AMM DEX

- + Anypad will allow creators to launch their tokens and innovative crypto/ blockchain projects across different chains via an open and fair IDO.
- + We also focus on the best **Memecoins** & **Micro-Cap coin** Projects , as we support new projects in the Blockchain & Defi Industry
- + Anypad DEX will plug into multiple liquidity sources across chains, including the cross-chain liquidity ecosystem.

Abstract

The purpose of this whitepaper is to understand the current problems of Defi and Blockchain in general while highlighting.

Making decentralized finance safer and more straightforward.

Making Initial decentralized exchange offerings (IDOs) easy to access for the non-elite crypto investor.

To create a trustless multi-chain decentralized exchange (DEX) with an automated market maker(AMM) optimized for the multi-chain Defi ecosystem.

ANYPAD

Introduction

The first-ever crypto token sale was held by Mastercoin in August 2013, where it raised about \$500,000 and in September 2014, Ethereum raised over \$18.4million with its token sale. Many projects went ahead to raise millions of dollars without any working product, resulting in the crack down and further strict regulations on Initial Coin Offerings.

With the explosion of Decentralized Finance in 2020, Decentralized exchanges increased in popularity, and Initial Decentralized Exchange Offerings became an inexpensive way to raise funds and avoid the centralized initial exchange offering model. This Initial Decentralized Exchange Offering has resulted in wide volatility in the market, price fluctuations, and scalability problems, with many investors incurring losses

Anypad is a decentralized platform that will leverage the power of Binance Smart Chain & Huobi Eco Chain to reinvent IDOs on its Multi-chain LaunchPad. Anypad will provide fair and accessible allocation for investors in IDOs via its guaranteed allocation method, a technique that will give stakers of the token priority while also aiding new projects in marketing, go-to-market strategies, technical advice, and general assistance.

The Problem

AMM

Automated market makers like Uniswap, Sushiswap, and Pancakeswap, dynamically adjust the asset's price based on supply and demand.

The advent of IDO's

The advent of Initial Decentralized Exchange Offering has resulted in wide volatility, with many investors losing on their investments. Projects now need to provide liquidity on their asset for sale and a quote currency for initial trading.

Rugpull attacks

Rugpull attacks which are unique to initial decentralized exchange offerings where a vulnerability to the smart contract is abused and the token value drops to \$0 have been recurring in the blockchain industry

Increased popularity

Also, increased popularity and usage of platforms such as Uniswap reinforced scalability issues, with Ethereum network fees skyrocketing and slow platform performance, leaving end-users frustrated.

Unfair Allocations

Unfair allocation of token sale to investors. Most Ventures Capital firms or funds as well as Blockchain influencers have dominated the Seed stages of most token sales, leaving the average investors with little or no opportunities in this regard

The Solution

+

Eliminate High Fees

First, to eliminate the unsustainable fees on Ethereum's ecosystem, all sales on Anypad are done through the Binance Smart Chain, Huobi Eco Chain, and its native token, \$APAD to secure sales. The advantage of using BSC & Huobe Eco Chain instead of Ethereum is due to their greater speed, reliability, and of course cheaper transactions fees, perfectly suited for the casual and advanced crypto users

+

Blockchain Incubator

To support new blockchain projects in starting up. Anypad would also provide new projects aid in marketing, go-to-market strategies, technical advice, and general assistance for new/start-up projects while also bridging the gap between early-stage projects and the community via its incubator platform.

+

Easy Access to Liquidity

To provide easy access to liquidity for new projects and other Defi projects via its Multi-chain Automated Market Maket DEX, while also preventing impermanent loss for liquidity providers and bringing interoperability to the Defi liquidity market

What is Anypad

Anypad is a decentralized platform that will allow blockchain projects to raise and exchange capital/ liquidity in a cheap, fast and fair manner. Anypad aims to continue the adoption of both Binance Smart Chain & Huobi Eco Chains by driving the incubation and funding of innovative projects.

The unique feature of Anypad is the possibility of making cross-chain swaps, which can provide higher throughput for safer, faster, and cheaper transactions while staying connected to other blockchains for liquidity.

Why BSC Chain

Binance Smart Chain (BSC) is a blockchain network built for running smart contract-based applications, running side-by-side with Binance Chain (BC), to allow users to get the best blockchain experience.

Features of Binance Smart Chain include

Why BSC Chain

Interoperability

**Cross-chain communication
with all blockchains**

Fast Throughput

**Heterogeneous sharding,
allowing faster transactions**

Governance

**On-chain governance
ensuring transparency and
decentralization**

High Security

**Proof-Of-Stake relay chain,
maintaining the integrity of
the network**

Why Huobi Eco Chain

Public Chain

HECO

TPS

500+

Block Time

03 Seconds

Average Fee

0.001 USD

Smart Contract

Seamlessly

10 USD

Not Supported

Why Huobi Eco Chain

HECO (Huobi ECO Chain) is a decentralized, high-efficiency and energy-saving public chain, also the first product launched by the Huobi Open Platform. It is compatible with smart contracts and supports high-performance transactions.

Why Heco Chain

Users are increasingly demanding

Secure, Ultra-Fast Swaps

The Possibility to Buy and Move Assets between blockchains

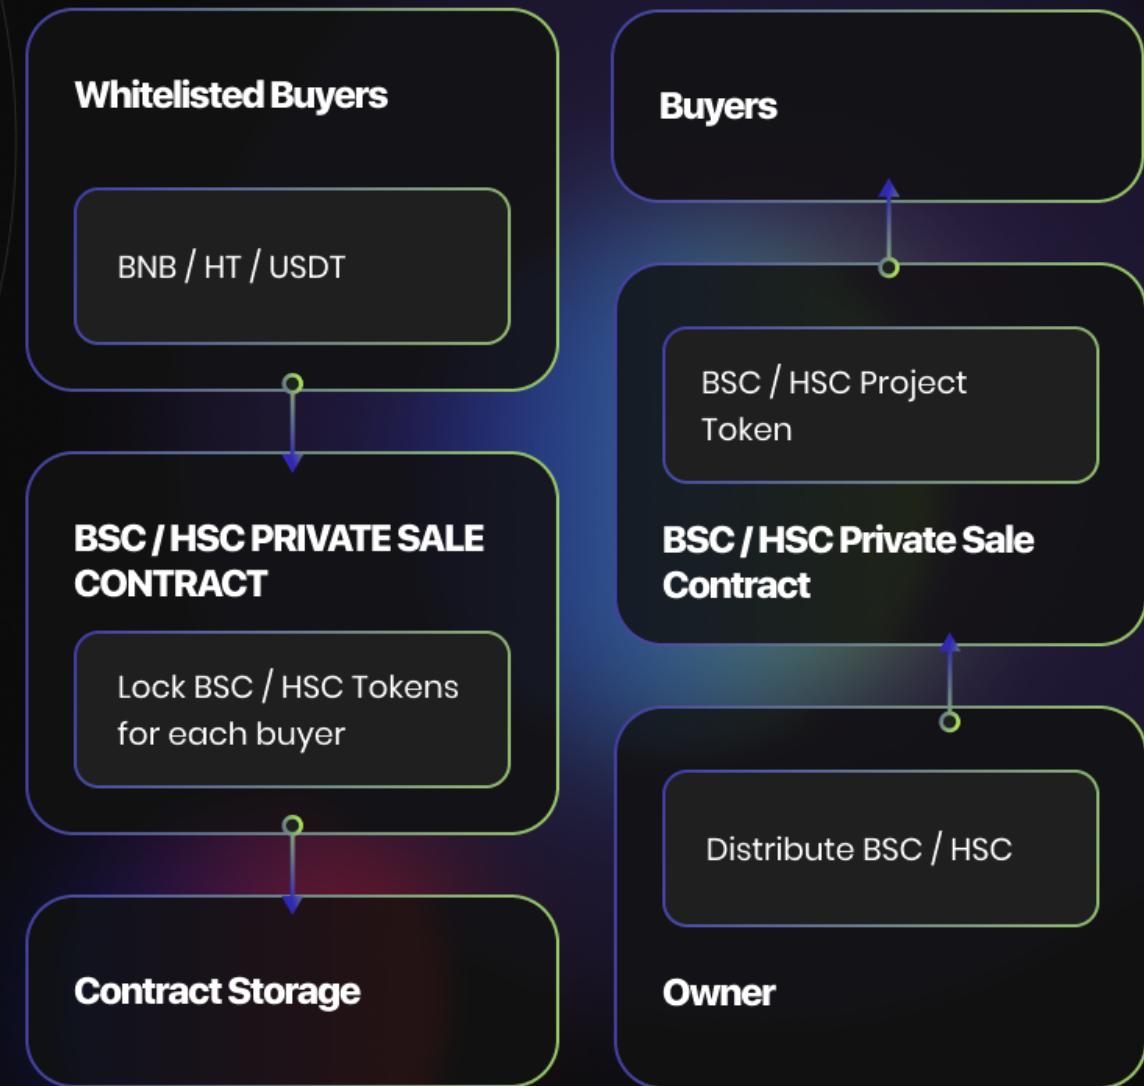

Cheap Transactions

User Friendly Design

LAUNCH PAD ARCHITECTURE

Anypad

LAUNCH PAD FEATURES

Anypad

Multi-Chain IDO Launch pad

**Anypad Launch Pad
Incubator**

**Anypad Multi-Chain
AMM DEX**

Multi-Chain IDO Launch Pad

Anypad Launch Pad will function as an IDO platform for users to join exclusive initial digital offerings by holding Anypad PAD tokens. Anypad PAD will partner with projects to aid them in marketing, go-to-market strategies, technical advice, and general assistance promoting an easy launch for new projects.

Anypad Launch Pad will allow creators to :

1

Easily launch tokens on multiple chains

2

Anypad Launch PAD would allow investors participate in a fair, secure and guaranteed Initial Decentralized Exchange Offerings via its alloocation methodology

Anypad PAD Incubator

Anypad PAD incubator will serve as the catalyst for innovative and emerging blockchain startups, serving as a one-stop-incubator for accelerating the growth of new blockchain projects. Anypad PAD incubator Program include:

Tokenomics

Token distribution, incentivizing behaviour in the network, and co-ordinating the Token Generation Event (TGE)

Networking and Counsel

Venture Capital Roadshow, Strategic direction on connecting with influencers, private investors, public raise, exchanges, among others.

Secure Escrow Lock-Up

Keeping of raised funds in a Secure Escrow via a Custodian Contract. Funds are released only after the project achieves its set milestones.

Business Development and Operational Support

Supporting start-ups in terms of technical developments, marketing, whitepaper development, team mentorship and more.

Creative Direction

Supporting start-ups in terms of technical developments, marketing, whitepaper development, team mentorship and more.

Anypad Multi-Chain AMM DEX

Anypad Multi-Chain Automated Market Maker (AMM) Decentralized Exchange would provide new and already existing blockchain projects, access to the most liquidity, lowest slippage and best exchange rates across the entire Defi ecosystem.

Anypad Multi-chain AMM DEX would source liquidity from a wide range of reserves, powering instant and secure token exchange in any decentralized application.

Anypad Multi-chain AMM DEX is the liquidity infrastructure for decentralized finance, aggregating liquidity from diverse sources into a single pool, which would provide the best rates for takers such as DAPPS, Wallets, DEXx and End users. This would enable users to perform their asset trades seamlessly on several blockchains from a single interface in a non-custodial way with full on-chain transparency and verifiable with instant transactions.

Anypad Multi-Chain AMM DEX would launch on Binance Smart Chain and would integrate other networks like Avalanche, HSC, Polkadot, Cosmos, Algorand for more interoperability

Why We Are Building A Multi-Chain AMM DEX

Empowering Traders Globally

Few have access to advanced tools & products in the existing financial system and would provide both new and already existing blockchain projects with these tools that would create sufficient liquidity, lower slippage, and best exchange rates for users. We believe in empowering more traders, in more places, with a powerful, transparent and fair open-source financial products that can be integrated into any application enabling value exchanges.

Impermanent Loss Insurance

Anypad AMM DEX is designed so that a liquidity provider always gets back the same value he/she originally deposits plus trading fees through impermanent loss insurance. Liquidity providers lock their liquidity in the liquidity pool for a minimum period of 200 days, after which they receive 100% compensation (accrued by 0.5% each day and 200% after 200 days). If there are not sufficient tokens in the pool to fully pay out impermanent loss compensation in the locked token/liquidity, part of the insurance may be paid out in an equivalent value os SAPAD

Professional Whitelisting Requirements

Tokens to be listed on the DEX must be verified with evidence of an audit from a known security auditor, while other administrative and technical processes also follow, ensuring that investors invest in verified projects.

Anypad Launch PAD Allocation Methodology

Private Sale

Holders of a minimum of 1,000 \$APAD tokens, who are selected in the whitelisting process will be guaranteed an allocation/ticket for a private sale and would also be eligible for an extra allocation/ticket if they hold more \$APAD tokens.

Public Sale

Both holders and non-holders of \$APAD tokens can participate in public in public sale. In the “Overflow” method, users can subscribe as much or as little as they want to the IDO, and their final allocation will be based on the amount of funds they put in as a percentage of all funds put in by other users at the time the sale ends. Users will receive back any leftover funds when they claim their tokens after the sale.

Advantage of Anypad

Fair Continuously Rising Price Floor

3% of each transaction is sent to liquidity and locked. This creates a rising price floor and better security long-term.

Earn Passive Income

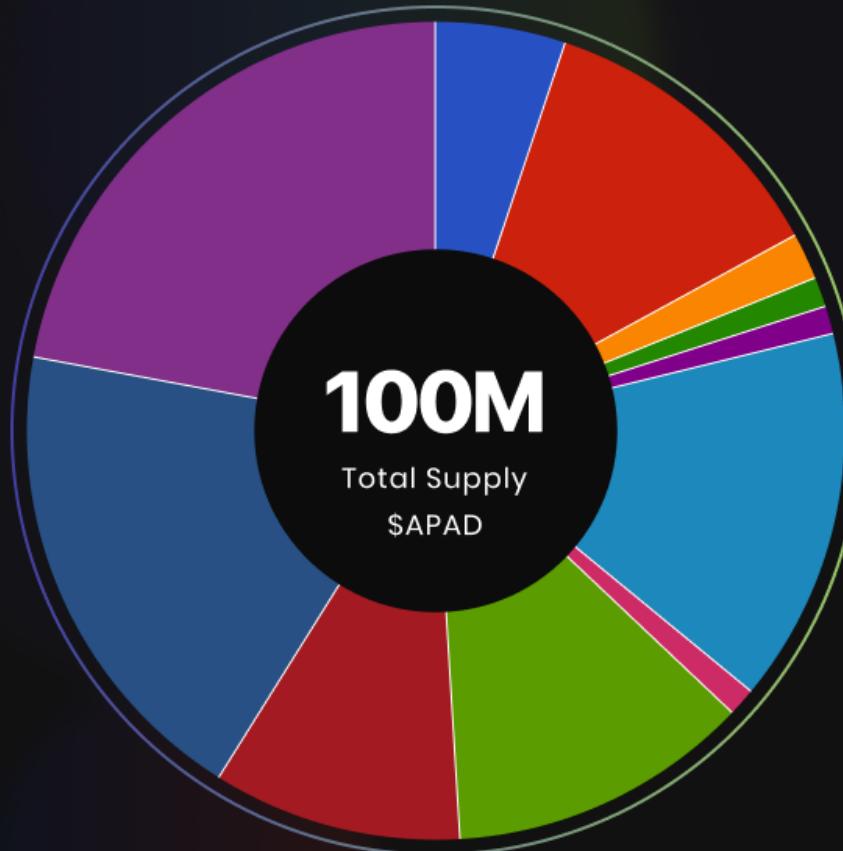

Anypad PAD transactions is subject to a 3% fee. The tokens collected from the fee are redistributed to existing wallet holders rewarding holders and disincentivizing quick trades.

Technical Advantage of Anypad PAD

- + Anypad PAD provides investors with carefully vetted, analyzed, and reviewed early-stage blockchain projects.
- + Anypad PAD bridges early-stage projects with the biggest and most engaging communities in the blockchain industry.
- + Anypad PAD brings a multi-chain AMM DEX aggregating liquidity from diverse sources for automated market-making against a smart contract, providing instant and safe token exchange for End-users.
- + Anypad PAD has developed an Anti-Bot program used to detect and prevent Bot activities on its platform
- + Anypad PAD integrates 3rd party KYC (Know Your Customer) services on its Launched platform.

Tokenomics

Seed Round	5%
Private Sale	12%
Public Sale	2%
DEX TGE ERC20	1%
DEX TGE BSC20	1%

months

Private Sale Tokens

10% on TGE & rest daily
distribution from 31st day for the
next 8 months

Road Map

Quarter 2

Conceptual creation of Platform, Whitepaper, Launch IDO Platform with BSC & Heco Chain Token DEX Listing, Exchange Listing

Quarter 4

Multi-Chain AMM DEX. Anypad is building a network of DEXes across blockchain. Anypad will plug in to multiple liquidity sources across chains, including the cross-chain liquidity ecosystem

Quarter 3

Cross chain launches integration of Solana, Matic and other community-selected Blockchains
